AI CREDENTIALS

- ▶ Studied AI at UT Austin, 1988-91 — three decades before the current wave
- ▶ Six AI products built and commercialised through ByZyB.ai
- ▶ Architected AI agent pricing, certification & cost governance at global scale
- ▶ Daily hands-on builder; advisor to boards on AI strategy

EXECUTIVE SUMMARY

Technology executive and recently retired EY Global Partner with 28 years at the firm and 40 in technology and risk governance. Oversaw a \$2B+ P&L, led the technical side of the proposed \$100B AssureCo/NewCo separation, and delivered two exits as an operating CEO. Studied AI academically in 1988-91 and builds AI products hands-on today — offering boards rare fluency in both AI governance and AI substance. Deep experience in cybersecurity, commercial strategy, and multi-jurisdiction operations across the UK, Canada, and the US. Seeking non-executive director roles or advisory roles where technology, AI oversight, and commercial risk sit on the board agenda.

BOARD & ADVISORY

- **Independent AI advisor** to boards and executive teams — what is worth pursuing in AI and what is not; AI governance, commercialisation paths, and operating-model design. Advisor to numerous boards throughout EY tenure.
- **Founder, ByZyB.ai** — building and commercialising six AI software products spanning applied language learning, writing integrity, design-system generation, and multi-jurisdiction regulatory compliance.

EXPERIENCE

Global CTO & AI Officer, Client Technology

Jan 2020 - Jun 2026

EY · London & Toronto

Led the global function for technology product adoption, AI strategy, commercial strategy, and value realisation across EY's Client Technology division. All Service Line technology officers reported into this organisation. Retired from the EY global partnership in June 2026.

- **\$2B+ P&L** — daily collaboration with regional CTOs across ten super-regions; architect of EY's core platform portfolio.
- **AI commercialisation & cost governance:** designed the firm's model for allocating AI and model consumption back to each business by engagement code, with agent certification and clear guidance on matching model choice to task — replacing the costly default of running frontier models on every workload.
- **EY Fabric:** global engineering platform powering 80+ platform products; 60% of consumption is client-facing solution development.
- **Commercial Hub:** SKU, pricing, ordering and billing engine — value-based pricing and revenue capture for technology, data, and AI agents.
- **Dynamics 365 CRM:** led enterprise-wide modernisation generating 35,000 new opportunities valued at US\$13.3B; 25,000 licences issued.
- **Everest transaction:** led the technical side of the proposed \$100B AssureCo / NewCo separation — Azure tenanting, legal-entity work, disposition of 4,000 applications across 16 months.

EDUCATION

University of Texas at Austin

Artificial Intelligence
1988 – 1991

McMaster University

Bachelor of Arts
1984 – 1988

PRIOR EXITS

Border Network → Secure Computing

\$190M acquisition · 1996

eSecurityOnline → Computer Associates

All-cash deal · 2003

PLATFORMS BUILT

- ▶ EY Fabric (components)
- ▶ MyEY
- ▶ Account LENS
- ▶ Commercial Hub
- ▶ Dynamics 365 (global CRM)
- ▶ AI agent pricing & billing engine

COO, Global Markets

2011 – 2020

EY · London

Led global market operations and the build-out of technology consulting capabilities firm-wide. Continued GDS expansion and integration of offerings across all service lines on a global scale.

- **Velon partnership:** built real-time telemetry (heart rate, power, GPS) for 18 top professional cycling teams; live IoT data delivered to fans, team managers, and broadcast partners including Eurosport.

Markets Implementation Leader, Americas Operating Committee

2009 – 2011

EY · New York

Sat on the Americas Operating Committee to steer growth, investments, and strategic direction; drove uniformity of offerings across service lines to support global expansion.

Deputy to Head of AABS / Deputy of Consulting

2008 – 2011

EY · London

- led the separation of Assurance/Audit from Advisory — the structure that became today's Consulting practice.
- **Enterprise Risk:** led the Enterprise Risk practice and conducted the enterprise risk assessment for the global firm for two years, reporting to the Global Executive Committee.
- **GDS:** oversaw the build-out of Global Delivery Services in India, Argentina, and Poland — now 60,000+ people.
- developed the legal structure and business model still used by GDS today, with incentives that drive equitable use of capacity across countries.
- rebuilt full-fledged management and technology consulting capability after years of preclusion following the Capgemini sale.

Canadian Consulting Leader

2003 – 2008

EY · Toronto

Led EY's Canadian consulting practice to market-leading growth across the Americas. Served as Global Coordinating Service Partner for several NYSE-listed clients, building accounts that generated over \$100M in annual revenue — sustained for four to six consecutive years.

Chief Executive Officer

1999 – 2003

eSecurityOnline LLC (EY subsidiary) · Kansas City

Full P&L responsibility for an EY-owned software business. Invented asset-tracking and security software products serving most of the major banks in the US, Canada, and the UK. Sold to Computer Associates in an all-cash deal in 2003.

Senior Manager → Partner, eCommerce & Security

1997 – 2000

EY · Cleveland, Ohio

Built EY's eCommerce practice at the Americas centre, then took over the Security practice. Made Partner in 1997, the same year as joining the firm.

President

1997

ASG Technologies · Toronto

Led a semiconductor-technologies company focused on improving chip manufacturing. The company was acquired.

Director of Marketing & Product Management

1994 – 1997

Border Network Technologies / Secure Computing · Toronto · Roseville, MN

Built firewall technologies at the dawn of enterprise internet security. Acquired by Secure Computing for \$190M in 1996. Took on responsibility for all products — commercial and government security technologies — within the larger organisation.

Available for non-executive director and board committee roles. Based between London and Toronto, with governance experience spanning the UK, Canada, the US, and markets worldwide across ten super-regions.
